

How to make (Christmas) rubber stamps yourself.

Hello everyone! I have often been asked about how I make my stamps and here's a DIY for you. Making stamps yourself is super easy and you can grow your own collection of stamps for various occasions.

You need:

- An eraser / rubber
- An inkpad
- A pencil

- A cutter set for linoleum

1. Draw your motif onto an eraser. 2. + 3. Choose the cutter with a small width. 4. Use it to cut out the outlines. 5. Choose a cutter with a bigger width. 6. Use it to cut out the areas between the pencil lines.

Try out your stamp and see if there's anything you want to correct.

You can make all different kinds of stamps and for example use them to embellish your Christmas mail. :)
Have fun,
Lu
