# GEMSTONE GARLAND

DIY AND TUTORIAL

Want a little bling? How about these way cute and WAY easy wood gemstone garlands?  
This whole project took me about an hour and that is with crazy children sabotaging me at every turn...SO it

could take less time.

Ok you guys, first off I am totally obsessed with balsa wood now! It is SO easy to work with and looks so amazing! I want to make wood garland all day long. Don't be surprised if there will be several tutorials using balsa wood in the future... I am now a true fan!

I really loved how these garlands turned out. How perfect would these be for an engagement party?

Read all about the tutorial after the jump

#### Supplies

balsa wood 1/16 x 3 x 36 (I got mine at Michaels)

x-acto knife

paint brush

gold cord

glue gun

paint

here are the colors I used:

black

white

Martha Stewart pearl-rubber ball

folk art-school bus

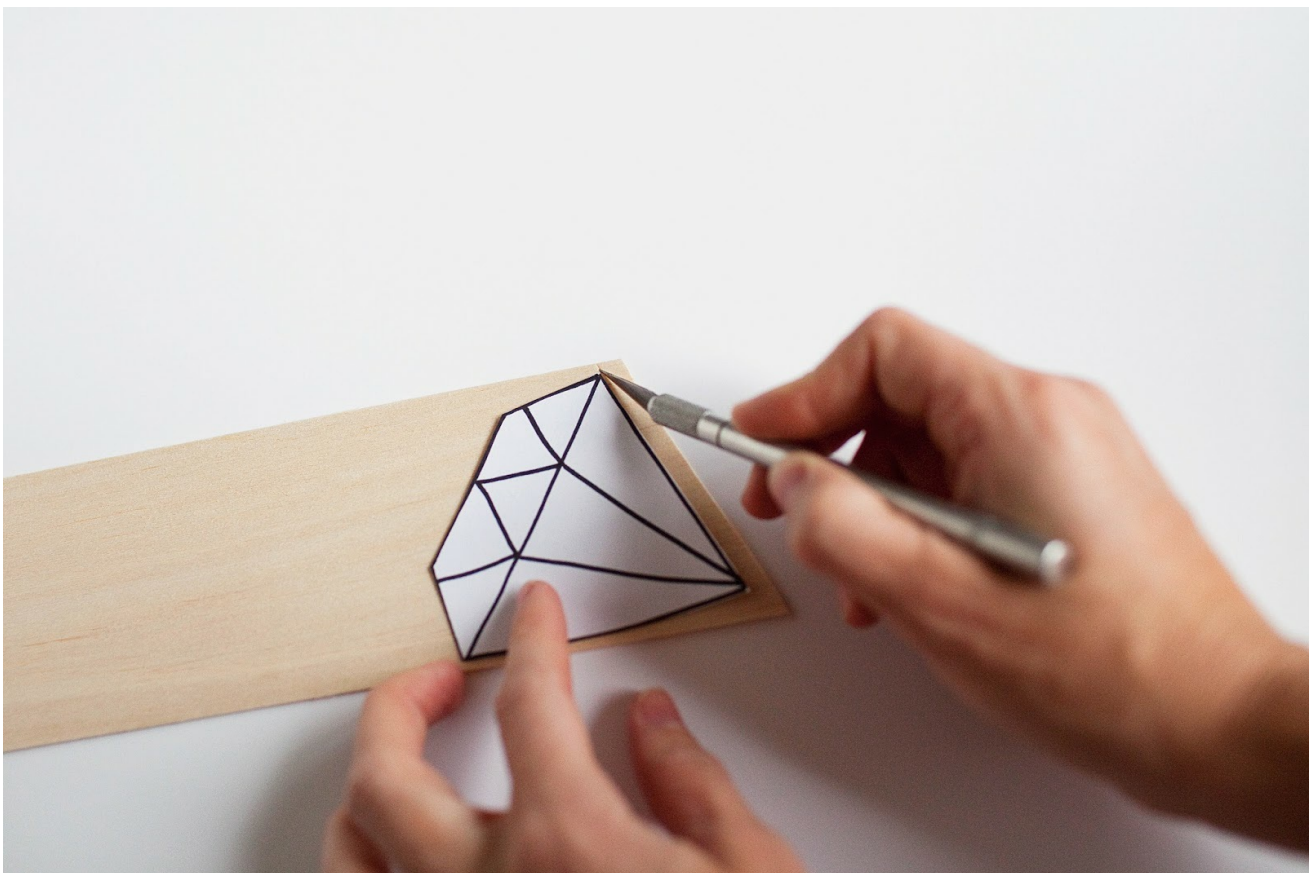

Martha Stewart pearl-mint chip

Martha Stewart-party streamer

Martha Stewart-scallion

Print out the paper and cut out the gem stones. You can download the file [HERE](#).  
I printed mine out onto card stock which makes it easier to cut around it with an x-acto knife.

outline the gems with paint and decorate however you would like, you can get creative.

with the other gems I outlined them with black and then filled them in with the other colors

glue the back at the top of each gem

stick on the cord
